W	ENDING SHELTER COUNT (date)	39	21	60

In a perfect world, the Ending Count is equal to the Beginning Count (A) plus Total Intake (F) minus all Outcomes (R+V). ----->

39 12 51

If your reported Ending Count does not match these numbers, please go back through your data and be sure you didn't miss something (i.e., animals in foster, adoptions, transfers, etc.). If all animals have been accounted for and the reported Ending Count is different, please indicate in the comment section.

COMMENTS: One healthy dog was euthanized due to his having played with a dead bat and later biting a child. As the dog had not received a rabies vaccine and a child was at risk, the dog had to be euthanized for rabies testing. Transferring animals between two shelters at times results in data entry errors. When looking at both shelters data combined, the data shows a 4 cat overage.

I agree that in completing this form, we have used the Maddie's Fund definitions of "Healthy," "Treatable - Manageable," "Treatable - Rehabilitatable," and "Unhealthy & Untreatable" as set forth in the attached document titled, "Maddie's Fund® Categorizations/Definitions of Shelter Animals."
