W ENDING SHELTER COUNT (date)	40	7	47

In a perfect world, the Ending Count is equal to the Beginning Count (A) plus Total Intake (F) minus all Outcomes (R+V). -----> 44 17 61

If your reported Ending Count does not match these numbers, please go back through your data and be sure you didn't miss something (i.e., animals in foster, adoptions, transfers, etc.). If all animals have been accounted for and the reported Ending Count is different, please indicate in the comment section.

Four dogs and 10 cats are unaccounted for due to a change in software from Chameleon to Petpoint mid March and then adding a second shelter to the software in Aug. As inventories are completed daily, this can only be due to data entry errors. One healthy cat was euthanized as it did not have a rabies vaccine and was found playing with a dead bat. A child was scratched by the cat leaving ADL testing as the only CO option. Sadly, Carson City has a high incidence of bat rabies.

I agree that in completing this form, we have used the Maddie's Fund definitions of "Healthy," "Treatable - Manageable," "Treatable - Rehabilitatable," and "Unhealthy & Untreatable" as set forth in the attached document titled, "Maddie's Fund® Categorizations/Definitions of Shelter Animals."
