

TNR Guidelines

The TNR (Trap-Neuter-Return) Program is intended for feral cats to be spayed/neutered, vaccinated, and ear-tipped before being returned to their original locations. Truly feral cats cannot be handled by humans, do not have an owner, and typically live in colonies.

Appointments are required. Please email reception@nevadahumanesociety.org or call at 775-473-9250 to schedule an appointment. The cost of services are **\$35.00** per cat and payment is due upon discharge.

Surgeries are on Wednesdays only. Drop off is between **7:00am and 8:30am**. Cats will be released at **3:00pm** same day. Please call if you have any questions regarding cancellations.

Drop off location:

2825 Longley Lane Suite C

Reno, NV 89502

The clinic entrance is to the far right side of the building.

Requirements

- Feral cats must be over 3 lbs, or 3 months of age
 - It MAY be possible for found/feral kittens 4-12 weeks of age to be admitted to the shelter as Good Samaritan Surrenders; please contact tnr@nevadahumanesociety.org or 775-856-2000 ext. 337 to discuss specifics and options
- Feral cats must arrive in a humane trap covered with a sheet or towel; other containers (carriers, boxes, bins) will NOT be accepted.
 - Traps can be rented from NHS when available
- Feral cats must be dropped off with an empty, clean, medium-sized plastic carrier with a towel inside to recover.

Following pick up

- Do not transport cats in the trunk of your car as they may be exposed to extreme heat, cold, and exhaust.
- Recommend providing a small bowl of water and ½ a can of wet food per cat until morning of release.
- Keep the cat in the covered plastic cat carrier in a quiet room, bathroom, or warm garage for the night after surgery. Carefully release the following morning, gently and away from traffic.

Thank you for helping our community cats!
